Industrial Session

Si Industrial Science and Technology in Japan, in the Past, Present and Future
— Messages from industrial leaders in 80's and 90's —

Speakers:

Shojiro Asai

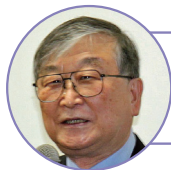

Hiroyuki Chuma

Yutaka Hayashi

Susumu Kohyama

Yoshio Nishimura

(Alphabetical order)

Organizer:

Meishoku Masahara (AIST, Japan)

Thirty years ago, Japanese semiconductor industry had a world-wide presence in the semiconductor market. In this session, industrial leaders who had built and supported the semiconductor industrial science and technology at that time and experts who have observed the semiconductor industry from outside, are invited to give us their own perspectives on Si Industrial Science and Technology in Japan based on their unique experiences.

From their messages, we will learn about the past and gain prospects of the future in semiconductor industrial science and technology in Japan.
